

# Work Platform Comparison

## NEW ZAP' platform vs. Sherpascope

| <b>Positive points</b>   | <b>ZAP 1 &amp; 2</b> | <b>Sherpascope</b> |
|--|----------------------|--------------------|
| <b>HEIGHTS:</b>  |                      |                    |
| <b>Overlapping heights between both work platform sizes</b>  | YES                  | NO                 |
| <i>More then 3 platform heights for each size,<br/>ZAP1 has 4 &amp; ZAP2 has 5 - as opposed to the 3 form the Sherpas!</i>   | YES                  | NO                 |
| <b>The closed height of the largest platform is below 3m</b><br><i>2.72m vs. 3.13m</i>   | YES                  | NO                 |
| <b>ZAP 2 fits inside a Vivaro/Traffic long wheel base van</b>  | YES                  | NO                 |
| <b>STABILISERS:</b>  |                      |                    |
| <b>Inverted stabilisers</b><br><i>Having the stabilisers angle inwards as opposed to in line with,<br/>the ladder sections creates extra stability</i>                             | YES                  | NO                 |
| <b>Easier and safer to move when erected due to inverted stabilisers</b>   | YES                  | NO                 |
| <b>Tubular stabiliser legs which offer more strength</b>   | YES                  | NO                 |
| <b>Stabilisers are fixed to the bottom section of telescopic ladder</b><br><i>Therefore stabilisers do not need to be adjusted when platform,<br/>heights is lowered or raised</i> | YES                  | NO                 |
| <b>SAFETY IN USE:</b>  |                      |                    |
| <b>Guardrails unfold and close automatically during opening &amp; closing</b>  | YES                  | NO                 |
| <b>Rung lock locking mechanism (not twist catch lock)</b><br><i>this practically eliminates finger traps</i>   | YES                  | NO                 |
| <b>Positive locking hook for platform and back section</b><br><i>this prevents the platform lifting when erected</i>   | YES                  | NO                 |
| <b>DESIGNS:</b>  |                      |                    |
| <b>Wheels inside ladder stiles (not outside) this prevents damage</b>  | YES                  | NO                 |
| <b>*Two stabiliser for back and front sections</b><br><i>*This enlarges the Sherpas foot print, which requires more floor space!</i>   | NO                   | YES                |

**Why use a Sherpa when the ZAP 5 - 9 rung offers the heights of both Sherpas at a fraction of the price!**
